

Lagos State Governor, Babajide Sanwo-Olu has declared the state's readiness to incorporate renewable, clean energy.

Sanwo-Olu, who addressed the Electrify Now agenda at the Global Renewables Summit, emphasized the need for renewable energy as well as the importance of Africa's inclusion in the agenda Electrify Now agenda.

"Africa has the resources needed for the renewable energy transition but we must also make the right investments and ensure that clean energy is affordable and accessible." he said.

He particularly highlighted the importance of such for Lagos, owing to its population of 24 million, while also pointing out funding as a major challenge.

"For Lagos, with a population of over 24 million people, access to reliable and clean energy cannot wait."

"Africa has the resources needed for the renewable energy transition but we must also make the right investments and ensure that clean energy is affordable and accessible."

He also revealed that 15 renewable energy distribution projects have been approved across the state, adding that "Lagos is ready to do its part".

He reiterated the importance of Africa's inclusion in the agenda, stating that it is a criteria for a fair transition. "If we are serious about a fair global energy transition, Africa must be part of the solution."
